DETAILED ACTION

Oath/Declaration

30. The oath or declaration is defective. A new oath or declaration in compliance with 37 CFR 1.67(a) identifying this application by application number and filing date is required. See MPEP §§ 602.01 and 602.02.

The oath or declaration is defective because:

It incorrectly states that the person making the oath or declaration has reviewed and understands the contents of the specification, including the claims, as amended by any amendment specifically referred to in the oath or declaration.

It should include the following language: "I acknowledge the duty to disclose information which is material to patentability of this application in accordance with Title 37, Code of Federal Regulations Section 1.56."

Claim Objections

31. Claim 1 is objected to because --and-- should be inserted after "polyurethane," (line 2) and ",," (line 2, second occurrence) should be deleted. Appropriate correction is required.

Claim Rejections - 35 USC § 112

32. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

33. Claims 4 and 7 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Art Unit: 3724

a. What are the units of hardness for "45" and "65" in claim 4.

For example; "Shore A", etc.

b. "the semiconductor wafer"(claim 7, line 2) lacks proper antecedent basis since it was not properly earlier referred to.

Claim Rejections - 35 USC § 102

34. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

35. Claim 7 is rejected under 35 U.S.C. 102(e) as being anticipated by Swisher et al(2005/0032464).

a. Swisher et al discloses a method of using a polishing pad to polish the surface of a semiconductor wafer(see abstract). Since applicant recites product by process claims, the polished surface of the semiconductor wafer of Swisher et al could have been polished by the polishing pad recited by applicant.

Allowable Subject Matter

36. Claims 1-3,5, and 6 are allowed.

Art Unit: 3724

37. Claim 4 would be allowable if rewritten or amended to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action.

Conclusion

38. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

a. The cited prior art discloses polishing pads and methods of using them to polish semiconductor wafers.
